

DEI is a Cancer killing our initiative and violating our Civil Rights. We are no longer judged for our capabilities, but by our **ancestry** and **biology**. What matters is our **identity**, and not our accomplishments.

We are a meritocracy empowered by **equal opportunity** to achieve, as individuals, to our fullest potential. DEI, however, is not equality. It is **Equity**, a failed Marxist ideology for the so-called “**marginalized**” chosen few, based on Sexual Preference and Skin Color.

Equity is Racism disguised as Fairness. It's unjust, unconstitutional, and has proven to be illegal discrimination. Court cases are piling up, and DEI organizations are learning that unfair employment practices are subject to public criticism and litigation. We're going to expose these organizations, and promote class action law suites with compensation. **DEI must DIE! Be buried. Never to Return!**

Business Cards will be sent to:

Board Members of Businesses; Senior Management of Institutions and Organizations supporting DEI Programs — especially those receiving financing by Taxpayers.

There will also be public demonstrations, and recruitment of employees affected by DEI Discriminatory Policies to participate in Class Action Lawsuits with Compensation.
